QRdocs

Simple document hosting with a public URL and printable QR code.

Proof of concept

What QRdocs Does

QRdocs turns a normal document into a simple hosted page and QR code. It is for businesses that already have a document and need customers, guests or visitors to scan it quickly.

• Upload a document.

• Choose a clean public path.

• Get a hosted document page.

• Get a printable QR page.

How To Use QRdocs

1. Upload	Choose a PDF, image, DOC or DOCX file.
2. Name	Choose the public document path, such as **my-doc**.
3. Create	QRdocs stores the file and creates a public document page.
4. Share	Use the document link or print the QR page.

Terms and Conditions

• QRdocs hosts documents supplied by the user. The user is responsible for making sure they have the right to upload and share the content.

• Documents should not contain private, sensitive or illegal material.

• QRdocs is a lightweight hosting and QR service. It does not provide legal, medical, financial or professional advice.

• The service may remove documents that are unsafe, unlawful, abusive or uploaded by mistake.

• The proof of concept is provided as-is while the product is being tested.

FireUX Ecosystem

QRdocs is a standalone product inside the FireUX ecosystem. FireUX provides the shared app shell, hosting patterns, dashboard/admin foundations and reusable product infrastructure. QRdocs focuses only on document hosting and QR sharing.
